

Vogt Tube Ice machines HES-20, HES-30, HES-40

In 1938, Vogt Ice revolutionized the ice making industry by introducing the world's first automatic sized icemaker. Today, Vogt HES (High Efficiency Series) Tube-Ice machines enjoy a well-earned reputation as the most energy efficient, dependable ice machines on the market. Heavy-duty industrial construction, automatic operation, and the best warranty in the business make the Vogt HES Series the only "clear" choice for your ice making needs.

Three settings are available:

- Cylinder (Tube-Ice) only
 - 7/8" Ice Diameter X 3/4" long (S)
 - 1 1/8" Ice Diameter X 1" long (M)
- Crushed Ice only
 - 3/16" to 1/4" thick on all models (approx.)
- Dual Ice Option
 - Both Cylinder and crushed ice for split bins

HES Features:

- 25 Year Life expectancy
- 3 Year parts warranty
- 3 Year labor warranty*
- 5 Year compressor warranty*
- 25 Year evaporator warranty
- Manufactured in accordance with the A.S.M.E. code
- Environmentally friendly Refrigerant R404A
- Optional CE marking

NOTE: MACHINE FOOTPRINT WITHOUT CASINGS: 40" X 26" X 54"

NOTE: ENERGY USAGE BASED ON MAKEUP WATER TEMPERATURE OF 70 °F, AMBIENT (AIR) TEMPERATURE OF 90 °F
 CAPACITY RATING IS AVERAGE FOR THE MODEL. INDIVIDUAL MACHINES MAY VARY +/- 5% .
 CAPACITY BASED ON AMBIENT (AIR) TEMPERATURE OF 90 °F
 CAPACITY REDUCED 17% ON 50HZ
 MAKE-UP WATER USAGE INCLUDES 20 % BLOWDOWN

Operating Conditions:

The ice machine shall not be subjected to an atmospheric temperature lower than 50°F nor higher than 90°F without effect on performance. Water for condensing and for ice making purposes shall be non-corrosive.
 The water shall be at a constant pressure not less than 30 lbs. at the ice machine location. The condition of the water to make satisfactory ice shall be the responsibility of the purchaser.

Air-Cooled Condensers:

The air-cooled condensers are available as remoted units only, with 50/50 split coil and low ambient controls. Vogt requires that the air-cooled condenser be purchased from the Vogt factory for warranty consideration and in order to assure proper sizing and operation. The ice capacity with an air-cooled unit will be the same as a water-cooled unit, as long as the ambient temperature does not exceed 90°F. For each 5°F increase in ambient temperature, the ice capacity will be decreased by approximately 3%.

Line Size Connections		
Ice Making Water		3/8" FPT
Drain Connections	Overflow	3/4" FPT
	Drip Pan	3/4" FPT
* Condenser Water	HES-20 & HES-30	3/4" FPT
Inlet and Outlet	HES-40	1" FPT
** Comp. Discharge & Condenser Return	1 1/8" OD	

NOTE: * WATER COOLED MACHINE / ** AIR COOLED MACHINE
