Cutter Drive

Note: The cutters on the original P24 units were nickel plated carbon steel driven by a belt & system off the bottom of a galvanized water tank. In 1977, the design was changed to the current drive setup and at the same time, the entire water tank and cutter was changed to stainless steel. Reliance one piece gearmotors were used until a design change in 1998 to the separate Grove and U.S. Motor. Note: Grove and Reliance reducers require different mounting configurations and are not interchangeable.
